## Sommario/riassunto

This collection of essays is the second volume in a projected series of five volumes that gather together recent research by leading scholars on the narrative function of embedded Jewish scripture texts (quotations or allusions) in early Christian Gospels. While the contributors employ a diverse range of methods, their research is directed towards considering the function of embedded scripture texts in the context of the Gospels as self-contained narratives written and read/heard in their early Christian settings. The essays are arranged according to their appropriate methodological categories
