Sommario/riassunto	What happens to scientific knowledge when researchers outside the natural sciences bring elements of the latest trend across disciplinary boundaries for their own purposes? Researchers in fields from anthropology to family therapy and traffic planning employ the concepts, methods, and results of chaos theory to harness the disciplinary prestige of the natural sciences, to motivate methodological change or conceptual reorganization within their home discipline, and to justify public policies and aesthetic judgments. Using the recent explosion in the use (and abuse) of chaos theory, Borrowed Knowledge and the Challenge of Learning across Disciplines examines the relationship between science and other disciplines as well as the

place of scientific knowledge within our broader culture. Stephen H. Kellert's detailed investigation of the myriad uses of chaos theory reveals serious problems that can arise in the interchange between science and other knowledge-making pursuits, as well as opportunities for constructive interchange. By engaging with recent debates about interdisciplinary research, Kellert contributes a theoretical vocabulary and a set of critical frameworks for the rigorous examination of borrowing.

Sommario/riassunto	"How to plan for the commercial real estate collapse Encompassing

apartment, office, retail, hospitality, warehouse, manufacturing, and flex or R & D buildings, commercial real estate (CRE) investment in the U.S. totaled \$6.4 trillion at the end of 2008. As noted in the February 2010 Congressional Oversight Panel Report, \$1.4 trillion of CRE debt is coming due by 2014 and half of the CRE projects securing such debt are underwater. Commercial Real Estate Restructuring Revolution: Strategies, Tranche Warfare, and Prospects for Recovery looks at how we got into this mess-impacts of the housing crisis, debt structures, lender-borrower collusion, and bankruptcy abuses-and offers possible solutions to the CRE crisis. Along the way, author Stephen Meister: Discusses how CRE value losses are being driven by investors' risk adjusted cap rates, not just poorer market fundamentals. Discusses strategies and emerging trends in CRE foreclosures, including forced lender fundings, lender attempts to chill bids and UCC foreclosure tactics and pitfalls. Proposes legislative solutions and explains how any rebound will require federal spending cuts, a vast deleveraging and a market clearing process. With a crashing CRE debt market and the hundreds of CRE-heavy regional banks destined for failure, getting out ahead of the curve is essential. Commercial Real Estate Restructuring Revolution addresses how we got here and how you can plan for the impending crash"--
