Sommario/riassunto	This collection of essays brings to the surface vital dimensions in the in the engagement between religion and ecology. The authors are aware of both the political urgency, but also the need to delve into a variety of diverse traditions in order to resource such a task, namely, what might religious traditions contribute to ecological debates? A core issue addressed here is how contemporary theology might become public theology, one that is deeply relevant to the particular problems and issues of today. This then raises important theoretical questions about how theology might engage with politi
