Autore	Thede Les (Leslie D.)
Titolo	Practical analog and digital filter design // Les Thede
Pubbl/distr/stampa	Boston, : Artech House, c2004
ISBN	1-58053-916-5
Edizione	[1st ed.]
Descrizione fisica	xiii, 267 p. : ill
Collana	Artech House microwave library
Disciplina	621.3815/324
Soggetti	Electric filters - Design and construction Microwave filters - Design and construction
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from title screen. Includes link to CD content.
Nota di bibliografia	Includes bibliographical references and index.

Sommario/riassunto

Master the most common analog and digital filter design and implementation methods with this hands-on new resource. The book explains in practical terms all the important derivations so you can apply them directly to your own filter design problems. Not only does it detail analog active and digital IIR and FIR filter design, the book also thoroughly treats implementation issues to steer you away from common design pitfalls.
