Sommario/riassunto

African Voices on Structural Adjustment presents 14 in-depth studies on the history and future of structural adjustment in Africa. Each study appraises the performance of structural adjustment policies (SAPs) with respect to a particular sector or issue. Each evaluates the compatibility of SAPs with the requirements for long-term development in Africa and, most importantly, each presents a truly African perspective. The contributors represent a outstanding collection of leading African economists and development experts.
