

1. Record Nr.	UNINA9910817232103321
Titolo	Advances in ultrametric analysis : 12th International Conference on p-adic Functional Analysis, July 2-6, 2012, University of Manitoba, Winnipeg, Canada / / Khodr Shamseddine, editor
Pubbl/distr/stampa	Providence, Rhode Island : , : American Mathematical Society, , 2013 ©2013
ISBN	1-4704-1024-9
Descrizione fisica	1 online resource (304 p.)
Collana	Contemporary mathematics, , 1098-3627 ; ; 596 , 0271-4132
Classificazione	46S1030G0612J2532P0526E3011S8030D3547L1046G1006F05
Disciplina	515/.7
Soggetti	Functional analysis
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Introduction --Preface --Affine Invariant Measures in Levi-Civita Vector Spaces and the Erdős Obtuse Angle Theorem --Some old and new results on zeros of the derivative of a -adic meromorphic function -- Survey on -adic meromorphic functions " "( ), " "( ) sharing a small function and additional properties -- The -adic -distributions -- Morphisms between ultrametric Banach algebras and maximal ideals of finite codimension -- Integral Representations of Continuous Linear Maps On -adic Spaces of Continuous Functions -- Subfields of valued, complete fields -- References -- On some classes of non-Archimedean operator algebras -- References -- Some identities and congruences for Stirling numbers of the second kind -- Non-measurable sets in the Levi-Civita field -- Partial Fractional Differentiability -- Part 1. A review on fractional differentiability in one Variable -- Part 2. Orthogonal Bases -- Part 3. Partial fractional differentiability in several variables -- A Generalized Keller space over a field with a valuation of rank > -- A comprehensive survey of non-archimedean analysis in Banach spaces over fields with an infinite rank valuation -- All proper multiplications on the completion of a totally ordered abelian group -- The Grothendieck approximation theory in non-Archimedean Functional Analysis -- A brief survey of the study of power series and analytic functions on the Levi-Civita fields -- On non-Archimedean generalized power series spaces.
