Sommario/riassunto

"The need to educate students about race and racism is felt acutely across higher education. Yet, in those colleges and universities that are predominantly White little exists in the way of practical guidance on how to go about this task. This book addresses some of the most common questions that teachers raise about how to teach students racial awareness at predominantly White institutions. This book will focus on practical tips, tools and techniques that teachers can use in their own teaching. Faculty members from across the disciplines say they are hungry for ideas on how to implement anti-racist education in their classrooms"--
