VII: The organization and methodology of the thought process; Ch. VIII: Chess talent; Ch. IX: Epilogue 1963; Appendix 1; Appendix 2; Bibliography; Index of Subjects; Index of Names
Sommario/riassunto	What does a chessmaster think when he prepares his next move? How are his thoughts organized? Which methods and strategies does he use by solving his problem of choice? To answer these questions, the author did an experimental study in 1938, to which famous chessmasters participated (Alekhine, Max Euwe and Flohr). This book is still usefull for everybody who studies cognition and artificial intelligence.
