

1. Record Nr.	UNINA9910817349803321
Titolo	Nanobiomaterials in clinical dentistry // edited by Karthikeyan Subramani, Waqar Ahmed, James K. Hartsfield, Jr
Pubbl/distr/stampa	Oxford, : William Andrew, 2013
ISBN	1-4557-3129-3 1-283-86848-2
Edizione	[1st ed.]
Descrizione fisica	1 online resource (542 p.)
Collana	Micro & nano technologies series
Altri autori (Persone)	SubramaniKarthikeyan AhmedWaqar HartsfieldJames K., Jr.
Disciplina	617.6 617.700284
Soggetti	Nanotechnology Nanostructured materials Biomedical engineering Dentistry
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	section 1. Introduction -- section 2. Nanoscale materials and their applications in dental biomaterials -- section 3. Nanobiomaterials in preventive and restorative dentistry -- section 4. Nanobiomaterials in orthodontics -- section 5. Nanobiomaterials in prosthodontics -- section 6. Nanobiomaterials in periodontics, implant dentistry, and dental tissue engineering -- section 7. Nanobiomaterials in endodontics -- section 8. Salivary diagnostics and nanoparticles as dental drug delivery systems and their biocompatibility/toxicity.
Sommario/riassunto	New nanomaterials are leading to a range of emerging dental treatments that utilize more biomimetic materials that more closely duplicate natural tooth structure (or bone, in the case of implants). This book brings together an international team of experts from the fields of materials science, nanotechnology and dentistry, to explain these new materials and their applications for the restoration, fixation, replacement, or regeneration of hard and soft tissues in and about the oral cavity and craniofacial region. The main topics covered include
