

1. Record Nr.	UNINA9910817387903321
Autore	Borel Michel
Titolo	Movement equations 3 : surrounding area of the solid, fundamental principle of dynamics, energy equations // Michel Borel, Georges Venizelos
Pubbl/distr/stampa	London, England ; ; Hoboken, New Jersey : , : Wiley : , : iSTE, , 2017 ©2017
ISBN	1-119-46708-X 1-119-46703-9 1-119-46709-8
Edizione	[1st edition]
Descrizione fisica	1 online resource (1 volume) : illustrations
Collana	Mechanical Engineering and Solid Mechanics Series. Non-deformable Solid Mechanics Set ; ; Volume 3
Disciplina	530.41
Soggetti	Solids Solid state physics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	This volume is the focal point of the work undertaken in the previous volumes of this set of books: the statement of the fundamental principle of the dynamics whose implementation, according to two paths whose choice depends on the problem to be treated, leads to equations of motion. In order to achieve this, it is treated first of all in the context of solids in their environment, as a prerequisite for the formulation of the fundamental principle. Then, in addition to its use in some exercises, the approach is illustrated by three particular cases. The first is an example where it is developed end-to-end and addresses the two approaches that lead to the equations of motion. The two other examples deal with two classical but important subjects, the movement of the Earth according to the hypotheses that can be stated about it, and Foucault's pendulum.
