Cannavo -- Confucius / Joel Jay Kassiola.
Sommario/riassunto	Contemporary environmental political theory considers the implications of the environmental crisis for such political concepts as rights, citizenship, justice, democracy, the state, race, class, and gender. As the field has matured, scholars have begun to explore connections between Green Theory and such canonical political thinkers as Plato, Machiavelli, Locke, and Marx. The essays in this volume put important figures from the political theory canon in dialogue with current environmental political theory.
