

1. Record Nr.	UNINA9910817558203321
Autore	Wainwright Mark
Titolo	Photosensitisers in biomedicine // Mark Wainwright
Pubbl/distr/stampa	Oxford ; ; Hoboken, N.J., : John Wiley/Wiley-Blackwell, 2009
ISBN	1-282-12359-9 9786612123597 0-470-74495-2 0-470-74494-4
Edizione	[1st ed.]
Descrizione fisica	1 online resource (298 p.)
Disciplina	615.8/31
Soggetti	Photosensitizing compounds Photochemotherapy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. Introduction -- pt. 2. Chemistry of photosensitisers -- pt. 3. Applications.
Sommario/riassunto	Photosensitisers in Biomedicine offers clear and comprehensive coverage of the many different photosensitiser types, including information on their many applications that now extend beyond anticancer therapy. These applications now include photoantimicrobial treatments not only in microbial disease, but also in the microbial resistance to conventional drugs, which is circumvented by photomicrobial action. The application of photoantimicrobials in biological fluids is also of considerable importance in the current era of HIV and is discussed in the book. This text offers the most up-to
