Sommario/riassunto	This is the first book written in English that tries to expose the "thing-in-itself (or inner logic)" of capitalism in a form homomorphic to Hegel's Logic , following the method previously established in Japan by Kôzô Uno (1987-1977). Neither 'bourgeois-liberal' nor even 'conventionally-Marxist' economics possess a logical (hence objective) knowledge of capitalism as such, which is regrettable. The manuscript of this book was completed in typescript at York University, Canada, in 1983, then privately published in that form by the author in about 500 copies, which are by now virtually dispersed. In order, however, to re-launch economics as objective knowledge, when the world must prepare itself to correctly terminate capitalism, we need to rediscover a book of this kind as a dependable guide.
