

1. Record Nr.	UNINA9910817602003321
Titolo	Computer-based medical guidelines and protocols : a primer and current trends // edited by Annette ten Teije, Silvia Miksch and Peter Lucas
Pubbl/distr/stampa	Amsterdam ; ; Washington, DC, : IOS Press, c2008
ISBN	600-00-0645-4 1-281-78627-6 1-4356-7810-9 1-60750-341-7
Edizione	[1st ed.]
Descrizione fisica	1 online resource (300 p.)
Collana	Studies in health technology and informatics, , 0926-9630 ; ; v. 139
Altri autori (Persone)	LucasPeter <1955-> MikschSilvia TeijeAnnette ten
Disciplina	610.285
Soggetti	Decision making - Data processing Medicine - Data processing Medicine - Decision making
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Title page; Preface; Contents; A Primer; Guideline Development; Computer-Interpretable Guideline Formalisms; From Guidelines to Careflows: Modelling and Supporting Complex Clinical Processes; Formal Methods for Verification of Clinical Practice Guidelines; The Temporal Aspects of Clinical Guidelines; Planning: Supporting and Optimizing Clinical Guidelines Execution; Adaptation of Clinical Practice Guidelines; Visualization Methods to Support Guideline-Based Care Management; Compliance with Clinical Practice Guidelines; Current Trends Compliance Checking of Cancer-Screening CareFlows: An Approach Based on Computational Logic Medical Guidelines for the Patient: Introducing the Life Assistance Protocols; DeGeL: A Clinical-Guidelines Library and Automated Guideline-Support Tools; A Constraint-Based Approach to Medical Guidelines and Protocols; TSNet - A Distributed Architecture for Time Series Analysis; Clinical Guidelines and Care

Pathways: A Case Study Applying PROforma Decision Support Technology to the Breast Cancer Care Pathway
Lessons Learned from Adapting a Generic Narrative Diabetic-Foot Guideline to an Institutional Decision-Support System
Verification of Medical Guidelines in KIV; Improving the Execution of Clinical Guidelines and Temporal Data Abstraction in High-Frequency Domains;
Applying Artificial Intelligence to Clinical Guidelines: The GLARE Approach; Glossary; Author Index

Sommario/riassunto

Presents results from different branches of computer science (in particular, artificial intelligence), medical informatics and medicine to examine approaches to computer-based guideline modeling, verification and interpretation.
