Sommario/riassunto	Why are jokes funny? Why do we laugh? In Funny Peculiar, Mikita Brottman demurs from recent scholarship that takes laughter-- and the broader domain of humor and the comical--as a liberating social force and an endearing aspect of self-expression. For Brottman, there is nothing funny about laughter, which is less connected to mirth and feelings of good will than to a nexus of darker emotions: fear, aggression, shame, anxiety. Brottman rethinks not only the mechanisms of humor but also the relation of humor to the body and the senses. To this end, she provides an engrossing accou

Sommario/riassunto	The sociology of education is a rich interdisciplinary field that studies schools as their own social world as well as their place within the larger society. The field attracts contributions from education, sociology, human development, family studies, economics, politics and public policy. This guide introduces students to the social constructions of our educational systems and their many players, including students and their peers, teachers, parents, the broader community, politicians and policy makers. The roles of schools, the social processes governing schooling, and impacts on society are all critically explored.

Sommario/riassunto	At the centre of this study is a shaman's chant performed during a three-week long feast in the eastern Himalayas. The book includes a translation of this 12-hour text chanted in Apatani, a Tibeto-Burman language, and a description of the events that surround it, especially ritual exchanges with ceremonial friends, in which fertility is celebrated. The shaman's social role, performance and ritual language are also described. Although complex feasts, like this one among Apatanis, have been described in northeast India and upland Southeast Asia for more than a century, this is the first book to present a full translation of the accompanying chant and to integrate it into the interpretation of the social significance of the total event.
