Sommario/riassunto

Fewer concepts in American society have received more attention recently than the need for skilled crisis intervention. Images of crises inundate internet and newspaper headlines, television screens and mobile devices. As a result of the growing amount of acute crisis events portrayed in the media that impact the lives of the general public, interest in crisis intervention, response teams, management, and stabilization has grown tremendously. Skills and methods to effectively manage acute crisis situations are in high demand. While many claim to understand the rapidly growing demand for effect
