

1. Record Nr.	UNINA9910817670803321
Autore	Joachim Mitchell
Titolo	XXL-XS : new directions in ecological design // Mitchell Joachim, Mike Silver
Pubbl/distr/stampa	New York, New York : , : Actar Publishers, , [2016] ©2016
ISBN	1-63840-915-3
Descrizione fisica	1 online resource (226 pages)
Disciplina	720.47
Soggetti	Architecture - Environmental aspects Sustainable architecture Art - Environmental aspects
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Projects -- Essays and interviews.
Sommario/riassunto	XXL-XS represents the emerging discipline of ecological design by assembling a wide range of innovators with diverse interests. Geo-engineering, synthetic biology, construction site co-robotics, low-energy fabrication, up-cycling waste, minimally invasive design, living materials, and molecular self-assembly are just a few of the important advances explored in the book. At one extreme are massive public works, at the other, micro to nano-sized interventions that can have equally profound impacts on our world. From terraforming to bio-manufacturing, a new generation of designers is proposing unique ways of confronting the difficult challenges ahead. In this way design becomes a totality of relationships that affects all disciplines, which can no-longer be thought of as self-contained fields, each handled separately by narrowly focused specialists. --
