Sommario/riassunto

This volume includes the reflections of leading researchers on Arabic and Semitic languages, also understood as systems and representations. The work first deals with Biblical Hebrew, Early Aramaic, Afroasiatic and Semitic. Its core focuses on morpho-syntactic, semantic, pragmatic, rhetoric and logic matters, showing Arabic grammar's place within the system of the sciences of language. In the second part, authors deal with lexical issues, before they explore dialectology. The last stop is a reflection on how Arabic linguistics may prevent the understanding of the Arabs' own grammatical theory and the teaching and learning of Arabic.
