

1. Record Nr.	UNINA9910817907603321
Autore	Keady Robert
Titolo	Equipment inventories for owners and facility managers : standards, strategies and best practices // Robert A. Keady, Jr, CEM, FMP
Pubbl/distr/stampa	Hoboken, New Jersey : , : John Wiley & Sons, Inc., , [2013] ©2013
ISBN	1-118-55485-X 1-118-55529-5
Descrizione fisica	1 online resource (462 p.)
Disciplina	658.7/87
Soggetti	Industrial equipment - Inventories Inventory control
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Published simultaneously in Canada"--Title page verso. Includes index.
Nota di contenuto	Financial and Resource Impact of Equipment Inventories on Facilities -- Equipment Inventory Types and Systems -- Industry Standards -- Equipment Data Points -- Equipment Identification and Tags -- Inventorying Equipment -- Appendix 1: Equipment Data Usage and Cross Reference Worksheet -- Appendix 2: Process Flow Maps.
Sommario/riassunto	The National Institute of Science and Technology estimates that the loss of information between the construction of a building and the operation and maintenance of that building results in a 15.8 billion dollar loss annually. The loss is due to inconsistent standards for how to capture information about the facility and its equipment. Drawing upon his twenty plus years of experience in facility management and his intimate knowledge of CSI classification systems and standards, Robert Keady tackles this problem head-on. Using industry standards that are already in use in the AEC industry, Ke
