Sommario/riassunto	Contributors; Index; "Since World War II, students in East and Southeast Asia have led protest movements that toppled authoritarian regimes in countries such as Indonesia, South Korea, and Thailand. Elsewhere in the region, student protests have shaken regimes until they were brutally suppressedmost famously in China's Tiananmen Square and in

Burma. But despite their significance, these movements have received only a fraction of the notice that has been given to American and European student protests of the 1960's and 1970's. The first book in decades to redress this neglect, Student Activism in Asia tells the story of student protest movements across Asia. Taking an interdisciplinary, comparative approach, the contributors examine ten countries, focusing on those where student protests have been particularly fierce and consequential: China, Japan, Hong Kong, Taiwan, South Korea, Indonesia, Burma, Malavsia, Thailand, and the Philippines. They explore similarities and differences among student movements in these countries, paying special attention to the influence of four factors: higher education systems, students' collective identities, students' relationships with ruling regimes, and transnational flows of activist ideas and inspirations. The authors include leading specialists on student activism in each of the countries investigated. Together, these experts provide a rich picture of an important tradition of political protest that has ebbed and flowed but has left indelible marks on Asia's sociopolitical landscape.
