mega-corps competitive? : some empirical tests of business competition / John Sarich and Jason Hecht.

Sommario/riassunto

The history of policymaking has been dominated by two rival assumptions about markets. Those who have advocated Keynesian-type policies have generally based their arguments on the claim that markets are imperfectly competitive. On the other hand laissez faire advocates have argued the opposite by claiming that in fact free market policies will eliminate "market imperfections" and reinvigorate perfect competition. The goal of this book is to enter into this important debate by raising critical questions about the nature of market competition. Drawing on the insights of the cla
