

1. Record Nr.	UNINA9910817990403321
Titolo	Polymer science and engineering : the shifting research frontiers // Committee on Polymer Science and Engineering, Board on Chemical Sciences and Technology, Commission on Physical Sciences, Mathematics, and Applications, National Research Council
Pubbl/distr/stampa	Washington, D.C., : National Academy Press, 1994
ISBN	1-280-19582-7 9786610195824 0-309-56674-6 0-585-02112-0
Edizione	[1st ed.]
Descrizione fisica	1 online resource (192 p.)
Disciplina	668.9
Soggetti	Polymers - Research
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	POLYMER SCIENCE AND ENGINEERING -- Copyright -- Preface -- Contents -- Summary and Recommendations -- POLYMER SCIENCE AND ENGINEERING: RELEVANCE AND OPPORTUNITIES -- FACTORS AFFECTING U.S. STRENGTH IN POLYMERS -- The U.S. Response to Global Competition -- Current Conditions and Trends in Research -- LOOKING AHEAD: FINDINGS, CONCLUSIONS, AND RECOMMENDATIONS -- Underlying Principles -- Research Balance for Long-term National Well-being -- Increased Interaction Between Polymer Researchers and Practitioners: Need for Interdisciplinary Appr... -- Attention to Supporting High-Priority Frontier Research Areas -- Further Study of Environmental Issues Related to Materials -- Encouragement of Active Collaboration Across Subfields of Materials Science and Engineering -- REFERENCES -- 1 National Issues -- RESEARCH FUNDING -- INTERNATIONAL COMPETITIVENESS -- EDUCATION IN POLYMER SCIENCE -- ENVIRONMENT -- HOUSING AND CONSTRUCTION -- ENERGY AND TRANSPORTATION -- NATIONAL DEFENSE -- REFERENCES -- 2 Advanced Technology Applications -- HEALTH, MEDICINE, AND BIOTECHNOLOGY -- Polymers in Health Applications -- Implants and

Medical Devices -- Diagnostics -- Controlled Drug Release --  
Biological Polymers -- Biopolymers Versus Synthetic Polymers --  
Biopolymers in Molecular Recognition -- Biopolymers in Biological  
Motion -- Bioelastomers -- Biocomposites -- Overlap Between  
Structural Biology and Polymer Science -- INFORMATION AND  
COMMUNICATIONS -- Polymer Dielectrics for Electronics -- Conducting  
Polymers and Synthetic Metals -- Polymer Sensors -- Resist Materials  
-- Compact Disk Technology -- Polymeric Materials for Photonics --  
Polymeric Light-emitting Diodes -- Polymers for Electrophotography --  
Polymers in Holography -- Conclusions -- REFERENCES -- 3  
Manufacturing: Materials and Processing -- MATERIALS -- Structural  
Polymers -- Plastics -- Thermoplastics.  
Thermosets -- Elastomers -- Fibers -- Adhesives -- Blends and Alloys  
-- Structural Composites -- Liquid Crystalline Polymers -- Films,  
Membranes, and Coatings -- Barrier Polymers -- Membranes --  
Coatings -- Inorganic Polymers -- POLYMER PROCESSING -- Melt  
Processing -- Molding -- Extrusion -- Solid-State Forming -- Solution  
Processing -- Dispersion Processing -- Process Models --  
CONCLUSIONS -- REFERENCES -- 4 Enabling Science -- POLYMER  
SYNTHESIS -- Control of Chain Architecture -- Topology -- Length --  
Sequence -- Isomerism -- Synthesis of Polymers of Controlled End-  
Group Structure -- Design and Synthesis of Thermally Stable Polymers  
-- Synthesis of Conjugated Polymers -- Modification of Polymer  
Surfaces -- Biocatalysis in Polymer Synthesis -- Development of New  
Polymerization Methods -- Exploring the Periodic Table: Inorganic  
Polymers -- Inorganic and Organometallic Polymers -- Network-  
forming Inorganic Polymers -- Hybrid Organic-Inorganic Polymers and  
Networks -- Opportunities and Challenges -- Reactive Processing --  
Supramolecular Chemistry -- Conclusions -- POLYMER  
CHARACTERIZATION -- Molecular Characterization -- Characterization  
of Solutions, Melts, and Elastomers -- Characterization of Polymer  
Solid-State Structure and Properties -- Characterization of Polymer  
Surfaces and Interfaces -- Characterization of Biopolymers -- Structure  
Determination -- The Folding Problem -- Conclusions -- THEORY,  
MODELING, AND SIMULATION -- States of Matter -- Polymer Solutions  
-- Amorphous Polymers -- Crystalline Polymers -- Liquid Crystalline  
Polymers -- Polymer Blends -- Block Copolymers -- Polymer Interfaces  
-- Polymer Surfaces and Thin Films -- Biopolymers -- Dynamics and  
Properties -- Local Motions in Polymers -- Rheology of Liquid Polymers  
-- Mechanical Properties -- Electro-active Properties -- Computational  
Methods -- Force-Field Simulation.  
Coarse-grained Simulations -- Mathematical Methods -- Conclusions  
-- REFERENCES -- APPENDIX: Contributors and Participants -- WRITING  
CONTRIBUTORS -- QUESTIONNAIRE PARTICIPANTS -- WORKSHOP  
PARTICIPANTS -- Index.
