   Descrizione fisica 1 online resource (100 p.)

   Collana   Information Management and Computer Security - Volume 15, Issue 5

   Disciplina   658.4/038

   Soggetti   Computer security
                      Information technology - Management
                      Management information systems

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Note generali   Description based upon print version of record.

   Nota di bibliografia   Includes bibliographical references.

   Nota di contenuto Cover; CONTENTS; EDITORIAL ADVISORY BOARD; Guest editorial;
                      Comply! Resistance is futile; Vendor availability: a key factor for
                      outsourcing in Chilean ICT sector; How well are information risks being
                      communicated to your computer end-users?; User-centred security
                      applied to the development of a management information system;
                      Improving protection mechanisms by understanding online risk; Usable
                      set-up of runtime security policies; Toward viable information security
                      reporting systems; On the imbalance of the security problem space and
                      its expected consequences

   Sommario/riassunto The first two papers in this e-book give a global perspective on
                      Information Management issues. The remaining papers are security-
                      focused, and have been selected for inclusion from the International
                      Symposium on Human Aspects of Information Security & Assurance
                      (HAISA 2007), which took place in Plymouth, UK, on 10 July 2007. The
                      theme of the event reflected that a significant aspect of protection
                      comes down to the attitudes, awareness, behaviour and capabilities of
                      the people involved.
