Sommario/riassunto	Photographs display attitudes, agency and vision in the way cities are documented and imagined. Cities and Photography explores the relationship between people and the city, visualized in photographs. It provides a visually focused examination of the city and urbanism for a range of different disciplines: across the social sciences and humanities, photography and fine art. This text offers different perspectives from which to view social, political and cultural ideas about the city and urbanism, through both verbal discussion and photographic representation.
