Record Nr.	UNINA9910818125403321
Autore	Fischer Olga
Titolo	Morphosyntactic change [[electronic resource]] : functional and formal perspectives / / Olga Fischer
Pubbl/distr/stampa	Oxford ; ; New York, : Oxford Univerity Press, 2007
ISBN	1-383-04094-X
	1-280-75375-7
	9786610753758
	0-19-151482-9
	1-4294-7071-2
Descrizione fisica	1 online resource (397 p.)
Collana	Oxford surveys in syntax and morphology
Disciplina	415/.9
Soggetti	Grammar, Comparative and general - Morphosyntax
	Linguistic change
	Grammar, Comparative and general - Grammaticalization
	Generative grammar
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [331]-359) and indexes.
Nota di contenuto	Contents; Acknowledgements; Abbreviations and explanation of technical terms; Introduction; Part I: General Issues in Morphosyntactic Change; Part II: Case Studies; References; Name Index; Subject Index
Sommario/riassunto	Olga Fischer presents a critical analysis of morphosyntactic change and the mechanisms that trigger it. She shows how changes in discourse, lexicon, semantics, pragmatics, and sound interact with changes in morphosyntax, and considers the interface between the internal and external factors of change. She reveals how rates and speed of change in morphosyntax can be used to explore the degree to which grammar is innate or learned. Her book will be of central interest and value to. students of linguistic change, at graduate level and above. - ;This book presents a critical comparison of the two l

	Sommario/riassunto	In recent years we may observe increasing interest in the development of social innovation both regarding theory as well as the practice of responding to social problems and challenges. One of the crucial challenges at the beginning of the 21st century is population ageing. Various new and innovative initiatives, programs, schemes, and projects to respond to negative consequences of this demographic process are emerging around the world. However, social theories related to ageing are still insufficiently combined with these new practices, social movements, organisational models, and institutions. Many scholars are still using notions and tools from classical theories of social gerontology or the sociology of ageing such as disengagement theory, activity theory, and successful and productive ageing. Such theories do not sufficiently explain ageing in the context of, for example, a broad use of the information and communications technologies (ICTs) including robotics and automation, new healthcare and long-term care models, advancements in the development and governance of age-friendly environments, and public engagement of older adults into co-production of services delivered by public, private, non-governmental as well as non-formal entities. In this Research Topic colect articles critically evaluating the existing social perspectives and theories in the field of ageing, introducing innovative approaches and comparative studies
