

1. Record Nr.	UNINA9910818130203321
Titolo	The CTSA program at NIH : opportunities for advancing clinical and translational research // Committee To Review the Clinical and Translational Science Awards Program at the National Center for Advancing Translational Sciences, Board on Health Sciences Policy ; Alan I Leshner, Sharon F. Terry, Andrea M. Schultz and Catharyn T. Liverman, editors ; Institute of Medicine of the National Academies
Pubbl/distr/stampa	Washington, District of Columbia : , : National Academies Press, , [2013] ©2013
ISBN	0-309-28477-5 0-309-28475-9
Descrizione fisica	1 online resource (178 p.)
Disciplina	610.72
Soggetti	Medicine - Research - Government policy - United States Medicine - Research - United States - Evaluation Medicine - Research - United States - Finance Research - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Introduction -- A vision for the CTSA program in a changing landscape -- Leadership -- Crosscutting topics -- Conclusion: opportunities for action.
Sommario/riassunto	"The NIH contracted with the Institute of Medicine (IOM) in 2012 to conduct a study to assess and provide recommendations on appropriateness of the CTSA Program's mission and strategic goals and whether changes were needed. The committee was also tasked with providing an independent appraisal of and advice on the implementation of the program by the National Center for Advancing Translational Sciences (NCATS), while exploring the contributions of CTSA's in accelerating the development of new therapeutics, facilitating disease-specific and child health research, and enhancing the integration of research funded by NIH institutes and centers. To

conduct this study, the IOM convened a 13-member committee with expertise in community outreach and engagement, public health and health policy, bioethics, education and training, pharmaceutical research and development, program evaluation, clinical and biomedical research, and child health research, along the full continuum of clinical and translation research. The committee's overarching conclusion is that the CTSA Program is contributing significantly to the advancement of clinical and translational research and is therefore a worthwhile investment that would benefit from a variety of revisions to make it more efficient and effective"--
