Nota di contenuto	Introduction : four stories of exclusion -- The Israeli health care system : an overview -- The "neoliberalization" of the Israeli health care system -- The health of Israeli Palestinians and Bedouins -- Migrant workers -- The Occupation as the ultimate violation of the right to health.
Sommario/riassunto	Controversy surrounds Jewish settlements in the occupied West Bank, and the radical national and religious agendas at play there have come to define the area in the minds of many. This study, however, focuses instead on the process of "normalization" in the life of Jewish residents. The works collected consider the transformation of the landscape, the patterns of relationships shared by the residents, and the lasting effects of Israel's settlement policy. They stress, in particular, such factors as urban planning, rising inequality and the retreat of the welfare state, and the changing political economy of industry and employment. In doing so, the authors provide new insight into the suburbanized areas which they argue are an integral part of the broader historical trends shaping Israel/Palestine.
