

1. Record Nr.	UNINA9910818190403321
Autore	Nourani Cyrus F.
Titolo	A functorial model theory : newer applications to algebraic topology, descriptive sets, and computing categories topos // Cyrus F. Nourani, PhD
Pubbl/distr/stampa	Toronto : , : Apple Academic Press, Inc. Boca Raton, FL : , : CRC Press, , [2014] ©2014
ISBN	0-429-18873-0 1-4822-3150-6
Edizione	[First edition.]
Descrizione fisica	1 online resource (296 p.)
Disciplina	512/.62
Soggetti	Infinitary languages Algebraic topology Descriptive set theory Categories (Mathematics)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Front Cover; About the Author; Contents; Preface; Chapter 1: Introduction; Chapter 2: Categorical Preliminaries; Chapter 3: Infinite Language Categories; Chapter 4: Functorial Fragment Model Theory; Chapter 5: Algebraic Theories, Categories, and Models; Chapter 6: Generic Functorial Models and Topos; Chapter 7: Models, Sheaves, and Topos; Chapter 8: Functors on Fields; Chapter 9: Filters and Ultraproducts on Projective Sets; Chapter 10: A Glimpse on Algebraic Set Theory; Bibliography
Sommario/riassunto	This book is an introduction to a functorial model theory based on infinitary language categories. The author introduces the properties and foundation of these categories before developing a model theory for functors starting with a countable fragment of an infinitary language. He also presents a new technique for generating generic models with categories by inventing infinite language categories and functorial model theory. In addition, the book covers string models, limit models, and functorial models.
