Inconsistency in the assessment of China's domestic and foreign patents / Fei Yu.

Sommario/riassunto

China has enjoyed unprecedented high economic growth for three decades. This growth has however been unbalanced and has led to some serious consequences which Chinese policy makers are now trying to rectify. One of the consequences is the deterioration of regional disparity which is threatening the stability of the Chinese society and hence the sustainability of current high economic growth in the country. This edited volume on China's regional development and economic growth is hence timely and contains a collection of the latest research reports in this field. The authors represent a disting
