Is the Patient's Presentation a Genuine One? The Case of Mrs Peahen -- 8. Reporting Your Findings -- 9. Six Not-So-Easy Clinical Dilemmas -- Summary --References
Sommario/riassunto	This book offers Australian mental health clinicians a locally written guide to the clinical interpretation of cognitive assessments using the Wechsler scales, including the WAIS-IV, the WMS-IV and the Advanced Clinical Solutions for WAIS-IV and WMS-IV. Using Australian case material, the reader is provided with empirical and interpretative analysis based upon the varying State legal requirements, the range of sociocultural uses to which intellectual assessment is put, and consideration of appropriate norms.
