Sommario/riassunto	This book provides a practical perspective on cognitive concerns and their relationship to vocational and psychosocial adjustment issues for people with multiple sclerosis (MS). It also provides practical approaches to rehabilitation, vocational, and psychosocial interventions, with illustrative case studies. Of particular note is that all tables, figures, and case study material complement the text and can be used for PowerPoint slides or overheads in training programs for allied health personnel. Of particular interest are discussions of the cognitive issues in MS, which have not previously
