Sommario/riassunto	Global warming is the most severe environmental challenge faced by humanity today and the costs of responding effectively will be high. While Russia's ratification of the Kyoto Protocol ensures the treaty's entry into force, lack of capacity, or incentives to renege on their commitments, will impede mitigation efforts in many countries. An important prerequisite for the proper functioning of the Protocol is that its compliance system - which is spelled out by the Marrakesh Accords - proves effective. Implementing the Climate Regime describes and

analyses Kyoto's compliance system. Organized in
