Sommario/riassunto	"The authors of this book are uniquely qualified to analyze the contemporary security landscape and promote necessary and pressing change. Each is a thought leader in his or her field. Four out of six authors are seasoned military professionals who share the view that the over-reliance on kinetic approaches over influence operations account for some of the failures of nations against extremists. Combined with civilian academic leadership this book is a practice in military civics. This collection of international perspectives, taken together, challenge commonly held assumptions and outmoded paradigms of engagement." --
