Dunger -- Hyperosmolar non-ketotic hyperglycaemia / Hans J. Woerle and John E. Gerich -- Insulin induced hypoglycaemia / Simon R. Heller -- Hypoglycaemia caused by insulin secretagogues / Kathleen M. Colleran, Andrew J. Krentz and Mark R. Burge -- Lactic acidosis in diabetes / Jean-Daniel Lalau and Jean-Michel Race -- Management of diabetes during surgery, myocardial infarction and labour / Aftab M. Ahmad and Jiten P. Vora.
Sommario/riassunto	While diabetes can usually be well-controlled using modern therapies, metabolic emergencies inevitably occur. This book provides an easy-to-read yet comprehensive account of emergencies in diabetes conveniently collected into one volume. For each topic, a brief review of the pathophysiology is followed by a description of cardinal clinical features, clinical and biochemical assessment and clinical management. Clear, informative text for rapid and easy assimilation Emphasis on evidence-based medicine Effective use of illustrations to highlight and summarize key points
