Sommario/riassunto	This special issue of the International Journal of Manpower examines the potentials and challenges of Internet data or ""Big Data"" for research in the social sciences with a special focus on human resources issues. Internet data are increasingly representing a large part of everyday life. The information is timely, perhaps even daily following the factual process. It typically involves large numbers of observations and allows for flexible conceptual forms and experimental settings. The introduction paper by Nikolaos Askitas and Klaus F. Zimmermann on ""The Internet as a Data Source for Advanc
