

1. Record Nr.	UNINA9910818584103321
Autore	Chen Zhizhang
Titolo	Introduction to direction-of-arrival estimation / / Zhizhang Chen, Gopal Gokeda, Yiqiang Yu
Pubbl/distr/stampa	Boston, : Artech House, c2010
ISBN	1-59693-090-X
Edizione	[1st ed.]
Descrizione fisica	1 online resource (195 p.)
Collana	Artech House signal processing library
Altri autori (Persone)	GokedaGopal <1976-> YuYiqiang
Disciplina	621.38483
Soggetti	Estimation theory Electrical engineering - Mathematics Signal processing - Mathematics Radio direction finders Electronics in navigation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction to Direction-of-Arrival Estimation; Contents; Preface; Chapter 1 Introduction; Chapter 2 Antennas and Array Receiving System; Chapter 3 Overview of Basic DOA Estimation Algorithms; Chapter 4 Preprocessing Schemes and Model Order Estimation; Chapter 5 DOA Estimations with ESPRIT Algorithms; Chapter 6 Analysis of ESPRIT-Based DOA Estimation Algorithms; Chapter 7 Discussions and Conclusion; Appendix; List of Abbreviations; About the Authors; Index.
Sommario/riassunto	Direction-of-Arrival (DOA) estimation concerns the estimation of direction finding signals in the form of electromagnetic or acoustic waves, impinging on a sensor or antenna array. DOA estimation is used for locating and tracking signal sources in both civilian and military applications. This authoritative volume provides an overview and performance analysis of the basic DOA algorithms, including comparisons between the various types. The book offers you a detailed understanding of the arrays pertinent to DOA finding, and presents a detailed illustration of the ESPRIT-based DOA algorithms compl.
