Sommario/riassunto	The Logic of Society was first published in 1975. In recent years challenges have arisen from various quarters, even within analytic philosophy itself, to the positivist conception of science, especially in its application to history and other social sciences. From a neo-positivist viewpoint Professor Addis attempts to meet some of these challenges. Underlying his work are the beliefs that every event that occurs, including human choices and actions, is capable of being given an explanation of the hypothetico-deductive sort, that the task of all the sciences therefore is the search for knowledge
