Sommario/riassunto	A pragmatic existential therapist exposes a suggestive underworld of clinical experience, not only disclosing direct experience of the erotization of the clinic, the erotization of the clinician, and the erotization of clinical confession, but also showing by example that these enchantments facilitate psychological healing if managed well. Addressing clinical and cultural concerns, the philosophically-minded dialogical therapist also offers a vigorous critique of the clinical

nihilism that defines psychotherapeutic practice in the postmodern clinic.
