

1. Record Nr.	UNINA9910818623303321
Titolo	Arctic shorebirds in North America [[electronic resource]] : a decade of monitoring // Jonathan Bart and Victoria Johnston, editors
Pubbl/distr/stampa	Berkeley, : University of California Press, 2012
ISBN	1-282-13418-3 9786613806765 0-520-95349-5
Edizione	[1st ed.]
Descrizione fisica	1 online resource (317 p.)
Collana	Studies in avian biology ; ; no. 44
Altri autori (Persone)	BartJonathan JohnstonVictoria Helen <1962->
Disciplina	598.3/309719
Soggetti	Shore birds - Canada, Northern Shore birds - Alaska Bird surveys - Canada, Northern Bird surveys - Alaska
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"A publication of the Cooper Ornithological Society."
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. Introduction -- pt. 2. Regional aspects -- pt. 3. Methodology -- pt. 4. Synthesis.
Sommario/riassunto	Each year shorebirds from North and South America migrate thousands of miles to spend the summer in the Arctic. There they feed in shoreline marshes and estuaries along some of the most productive and pristine coasts anywhere. With so much available food they are able to reproduce almost explosively; and as winter approaches, they retreat south along with their offspring, to return to the Arctic the following spring. This remarkable pattern of movement and activity has been the object of intensive study by an international team of ornithologists who have spent a decade counting, surveying, and observing these shorebirds. In this important synthetic work, they address multiple questions about these migratory bird populations. How many birds occupy Arctic ecosystems each summer? How long do visiting shorebirds linger before heading south? How fecund are these birds? Where exactly do they migrate and where exactly do they return? Are their populations growing or shrinking? The results of this study are

crucial for better understanding how environmental policies will influence Arctic habitats as well as the far-ranging winter habitats used by migratory shorebirds.
