Sommario/riassunto	The book interrogates the disciplinary biases and firewalls that inform mainstream international relations today, and problematises the several tropes that have come to typify the strategic histories of post-colonial societies such as India. Questioning a range of long-held cultural representations on India, the book challenges such portrayals and underscores the centrality of context and contingency in any cultural explanation of state behaviour. It argues for a historico-cultural understanding of power and critiques IR's tendency to usher in a selective 'return of history'.
