Sommario/riassunto	"For many women breast cancer is one of the most distressing of all diseases. Breast Cancer examines the effects of the disease through all stages of diagnosis and treatment. Making extensive use of verbatim accounts by women of their experiences, it intersperses these with relevant findings and theories from recent scientific research. The book's emphasis on the psychosocial impact of the disease and its treatment will help all those who care for breast cancer patients to understand the distress involved and the means of alleviating it."--
