Note generali Wijdicks. 3rd ed. 2009. Nota di bibliografia Includes bibliographical references and index. Nota di contenuto Contents; Part I. General Principles of Recognition of Critically III Neurologic Patients in the Emergency Department; Part II. Evaluation of Presenting Symptoms Indicating Urgency; Part III. Evaluation of Presenting Symptoms Indicating Critical Emergency; Part IV. Organization of the Neurosciences Intensive Care Unit; Part V. General Principles of Management of Critically III Neurologic Patients in the Neurosciences Intensive Care Unit; Part VI. Technologies in the Neurosciences Intensive Care Unit; Part VII. Management of Specific Disorders in Critical Care Neurology Part VIII. Postoperative Neurosurgical and Neurointerventional ComplicationsPart IX. Management of Systemic Complications; Part X. Decisions at the End of Life and Other Responsibilities; Part XI. Guidelines, Formulas, and Tables; Appendix; Index Sommario/riassunto The Practice of Emergency and Critical Care Neurology serves as the

definitive authoritative reference on the care of the patient with a critical neurologic disorder at risk of deterioration and in need of immediate attention. This work is an expanded new edition of the book on the management of patients with critical neurologic disorders. This single-authored monograph is broad in scope and follows the patients from the very moment they enter the emergency department to their care in the neurosciences intensive care unit. This book condenses the essential information into several sections. Th
