Index.

Sommario/riassunto

This book is the first volume describing the wood and non-wood forest products in Zambia. It is an all-in-one information package, a one stop reference book about the characteristics of the forest sector that provides information on production, market, and trade as well as related policies and legislations. This volume is a compilation from research and surveys conducted in various provinces and districts of Zambia. In the book, the production and various uses of wood and non-wood forest products in different parts of Zambia are presented in a way that enables the reader to appreciate this sector in detail.--
