Titolo	Books in early modern Norway [[electronic resource] /] / by Gina Dahl
Pubbl/distr/stampa	Leiden ; ; Boston, : Brill, 2011
ISBN	1-283-16195-8 97866613161956 90-04-21499-2
Descrizione fisica	1 online resource (262 p.)
Collana	Library of the written word, , 1874-4834 ; ; v. 17. The handpress world ; ; v. 11
Disciplina	070.509482
Soggetti	Book industries and trade - Norway - History Publishers and publishing - Norway - History Books and reading - Norway - History Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Preliminary Material / G. Dahl -- 1. Introduction / G. Dahl -- 2. Books And Their Distribution / G. Dahl -- 3. Books Of Ordinary People / G. Dahl -- 4. Books Of The Clergy / G. Dahl -- 5. Books And The Liberal Arts / G. Dahl -- 6. Books On Medicine / G. Dahl -- 7. Books On Jurisprudence / G. Dahl -- 8. Enlightenment And Expansion / G. Dahl -- 9. Books For Entertainment / G. Dahl -- 10. Conclusion / G. Dahl -- Appendix 1 / G. Dahl -- Bibliography / G. Dahl -- Index / G. Dahl.
Sommario/riassunto	During recent decades much has been written about early modern book distribution, but until now Norway has been absent from the discussion. Drawing on book listings, this study seeks to fill this lacuna by exploring the market for books in early modern Norway. Its approach is multifaceted: consideration of the types of books accessed by different elements of Norwegian society is set alongside developments within the book market itself, such as the extended life of popular books, the gradual replacement of Latin by the vernacular and the rise in the eighteenth century in the number of books available on the market. The study demonstrates the internationality of the Norwegian book market while acknowledging specific patterns that

determine its Norwegian character.

Livello bibliografico	Monografia
Nota di contenuto	Machine generated contents note: -- Section A: Skull Base I. Pituitary-Tumor Surgery. II. Anterior Skull-Base TumorsIII. Craniovertebral Junction. Section B: Paraventricular Lesions. IV. Management of Colloid Cysts. Section C: Neurovascular. V. Decompression of Cranial Nerves. VI. Clipping of Cerebral Aneurysms. VII. Evacuation of Intraparenchymal Hemorrhage. VIII. Approaches to Brainstem Cavernous Malformations. Section D: Tumors. IX. Intraparenchymal Brain Tumors. Section E: Pediatrics. X. Craniostomosis Surgery. Section F: Spine and Peripheral Nerves. XI. Cervical Discectomy/Foraminotomy. XII. Thoracic Discectomy. XIII. Endoscopic Versus Open Carpal Tunnel Release. Section G: Technology.
Sommario/riassunto	"A unique perspective on neuroendoscopic versus microsurgical techniques from world-renowned neurosurgeons. In the last two decades, neuroendoscopy has evolved from a fringe neurosurgical tool to an established subspecialty focusing on the treatment of diverse cranial and spinal diseases. Today, neuroendoscopic technology is widely used to treat supratentorial diseases, skull base pathologies, craniocervical diseases, and spinal pathologies. Despite the expanded use of neuroendoscopy across several subspecialties, its benefits and disadvantages versus those of traditional microsurgical methods

remain highly controversial. Contradictory evidence in the neurosurgical literature adds to the surgical decision-making challenges for veteran and novice practitioners alike. Controversies in Neuroendoscopy by Peter Nakaji and Hasan Zaidi fills an unmet need for a book encompassing best practices, patient selection, and limitations and advantages of neuroendoscopic surgical approaches. Each case presents firsthand knowledge of internationally esteemed neurosurgeons, with a moderator, an endoscopic expert, and an expert in traditional microsurgical approaches. The unique discussion of neuroendoscopy versus microsurgery enables readers to compare the benefits and pitfalls of endoscopic and open microsurgical procedures for a wide range of conditions. In-depth comparative guidance on applications of the flexible endoscope, rigid endoscope, 3D endoscope, and high-definition 2D endoscope versus the microscope. A full spectrum of neurological conditions across the age continuum with comparative approaches for skull base surgery, pituitary surgery, hydrocephalus, spinal surgery, peripheral nerve surgery, and arachnoid cyst fenestration. Radiological imaging and intraoperative photographs enhance cases and provide precise, insightful technical guidance. High-quality color illustrations from the skilled medical illustrators at Barrow Neurological Institute reinforce key points and surgical techniques. Neurosurgery residents, neurosurgeons, and spine surgeons will all benefit from reading this remarkable book cover to cover, and they will no doubt use it as a go-to resource for specific cases"--Provided by publisher.
