Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	section 1. The structure of economic evaluation -- section 2. Measuring and valuing resource use -- section 3. Measuring and valuing consequences -- section 4. Presenting and interpreting the evidence -- section 5. Appraising the quality and usefulness of economic evaluation.
Sommario/riassunto	There are so many ways in which health might be improved today and, as technology improves, the opportunities will increase. However, there are limits to budgets as well as other resources so choices have to be made about what to spend money and time on. Economic evaluation can help set out the value of the costs and benefits from competing choices.
