Edizione	[1st ed.]
Descrizione fisica	1 online resource (216 p.)
Collana	Routledge studies in ecological economics ; ; 19
Disciplina	338.9/27
Soggetti	Sustainable development Economic development - Forecasting Human ecology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction -- The sustainability issue in the economic literature -- The sustainability issue and sustainability concepts -- The economics of intertemporal decisions -- The emergence of sustainability criteria -- Some comments on key results -- and misleading interpretations -- What can we preserve for future generations? -- Invariance theories and sustainable development -- Invariance in growth theory -- Weak invariance : the viability approach -- What we can preserve for future generations -- Conclusion.
Sommario/riassunto	Is development sustainable? When addressing the sustainability issue, decision-makers are faced with two challenges: taking into account conflicting issues, such as economic development and environmental preservation, while also ensuring intergenerational equity. Tackling these challenges amounts to deciding what should be bequeathed to future generations, especially in terms of natural resources.
