Sommario/riassunto

Lead firms, development organisations, donors and governments view value chains and voluntary standards as vital instruments for achieving millennium development goals through trade and market-related interventions. The precise foundations for these development strategies, which suggest positive development outcomes from integration of poor actors into value chains, are as yet underdeveloped. The interdisciplinary work in this volume shows how trade is managed and asks theory-driven questions about how value chains relate to locally-rooted development processes. Policy makers a
