Rosen -- General Index / Ineke Sluiter and Ralph M. Rosen.

Sommario/riassunto

How do people respond to and evaluate their sensory experiences of the natural and man-made world? What does it mean to speak of the 'value' of aesthetic phenomena? And in evaluating human arts and artifacts, what are the criteria for success or failure? The sixth in a series exploring 'ancient values', this book investigates from a variety of perspectives aesthetic value in classical antiquity. The essays explore not only the evaluative concepts and terms applied to the arts, but also the social and cultural ideologies of aesthetic value itself. Seventeen chapters range from the 'life without the Muses' to 'the Sublime', and from philosophical views to middle-brow and popular aesthetics. Aesthetic value in classical antiquity should be of interest to classicists, cultural and art historians, and philosophers.

Sommario/riassunto

"Are you looking for concise, practical answers to those questions that are often left unanswered by traditional pediatric ophthalmology references? Are you seeking brief, evidence-based advice for complicated cases or controversial decisions? Curbside Consultation in Pediatric Ophthalmology: 49 Clinical Questions provides quick answers to the tricky questions most commonly posed during a "curbside consultation" between pediatricians. Dr. Rudolph Wagner has designed this unique reference which offers expert advice, preferences, and opinions on tough clinical questions commonly associated with pediatric ophthalmology. The unique Q&A format provides quick access to current information related to pediatric ophthalmology with the simplicity of a conversation between two colleagues. Numerous images, diagrams, and references allow readers to browse large amounts of information in an expedited fashion. Curbside Consultation in Pediatric Ophthalmology: 49 Clinical Questions provides information basic enough for residents while also incorporating expert advice that even high-volume pediatricians will appreciate. Pediatricians, nurse practitioners, emergency room physicians, physician assistants and family practitioners will benefit from the user-friendly, casual format and the expert advice contained within"--
