A Postmodern Research Odyssey -- 10. Is There Room for the Spirit in a World Dominated by Technology? Pentecostals and the Technological World -- List of Contributors -- Index.

Sommario/riassunto

What might be described as a Pentecostal worldview has become a powerful cultural phenomenon, but it is often at odds with modernity and globalization. Science and the Spirit confronts questions of spirituality in the face of contemporary science. The essays in this volume illustrate how Pentecostalism can usefully engage with technology and scientific discovery and consider what might be distinctive about a Pentecostal dialogue with the sciences. The authors conclude that Pentecostals, with their unique perspectives on spirituality, can contribute new insights for a productive interaction between theology and science.
