

1. Record Nr.	UNINA9910818979703321
Titolo	Insect-fungal associations : ecology and evolution // edited by Fernando E. Vega, Meredith Blackwell
Pubbl/distr/stampa	New York, : Oxford University Press, c2005
ISBN	0-19-029035-8 0-19-770140-X 1-280-53400-1 0-19-803727-9 1-4237-8515-0
Edizione	[1st ed.]
Descrizione fisica	1 online resource (352 p.)
Collana	Oxford scholarship online
Altri autori (Persone)	VegaFernando E BlackwellMeredith
Disciplina	632/.96
Soggetti	Fungi as biological pest control agents Insect pests - Biological control Fungi in agriculture Insect-fungus relationships
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Formerly CIP. Previously issued in print: 2005.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents; Introduction: Seven Wonders of the Insect-Fungus World; 1. Phylogenetics of the Insect Pathogenic Genus Beauveria; 2. Phylogeography of Metarhizium, an Insect Pathogenic Fungus; 3. Interactions between Entomopathogenic Fungi and Arthropod Natural Enemies; 4. Ecology and Evolution of Fungal Endophytes and Their Roles against Insects; 5. The Fungal Roots of Microsporidian Parasites; 6. Fungal Biotrophic Parasites of Insects and Other Arthropods; 7. Reciprocal Illumination: A Comparison of Agriculture in Humans and in Fungus-growing Ants 8. Evolutionary Dynamics of the Mutualistic Symbiosis between Fungus-Growing Termites and Termitomyces Fungi 9. The Role of Yeasts as Insect Endosymbionts; 10. The Beetle Gut as a Habitat for New Species of Yeasts; 11. Ecology and Evolution of Mycophagous Bark Beetles and Their Fungal Partners; Conclusion: Symbioses, Biocomplexity, and

Metagenomes; Index; A; B; C; D; E; F; G; H; I; J; K; L; M; N; O; P; Q; R; S;
T; U; V; W; X; Y; Z

Sommario/riassunto

There is an increasing interest in using fungi as bio control agents for insect pests in agricultural systems, and also a growing interest in the basic biology of insect-fungal associations from the perspective of parasitism, symbiosis and infection. This title covers topics in this field.
